

DEFENSE REPORT

Here is how well you defended your experience

Most claims need real work before an interview. Add specifics, numbers, and your personal role to each one.

Claim 1

Needs polish

Data Analyst | Power BI · SQL · Databricks · Python · AI & LLM Engineering

Add one concrete number and name your exact personal contribution before the real interview.

Claim 2

Needs polish

Analyst with proven experience building end-to-end data pipelines, BI dashboards, and ML-backed analytics platforms across healthcare domains.

Add one concrete number and name your exact personal contribution before the real interview.

Claim 3

Needs polish

Delivered a 400K+ row RCM analytics system, a 29-measure Power BI report suite, and LLM-integrated solutions using Databricks, Python, and FastAPI.

Add one concrete number and name your exact personal contribution before the real interview.

Claim 4

Needs polish

Strong foundation in data modeling, KPI design, medallion architecture, and RAG pipeline development — consistently converting complex business requirements into structured, scalable analytical solutions.

Add one concrete number and name your exact personal contribution before the real interview.

Claim 5

Needs polish

Programming Python (Pandas, NumPy, Matplotlib, FastAPI)

Add one concrete number and name your exact personal contribution before the real interview.

Claim 6

Needs polish

Query & Databases SQL (MySQL), DAX, Power Query

Add one concrete number and name your exact personal contribution before the real interview.

Claim 7

Needs polish

BI & Visualization Power BI, Tableau, Advanced Excel

Add one concrete number and name your exact

Claim 8

Needs polish

Big Data & Cloud Databricks, PySpark, Delta Lake

Add one concrete number and name your exact

personal contribution before the real interview.

personal contribution before the real interview.

Claim 9

Needs polish

AI & LLM Engineering LangChain, RAG Pipelines, OpenAI API, Claude API (Anthropic), Gemini, Generative AI Fundamentals

Add one concrete number and name your exact personal contribution before the real interview.

Claim 10

Needs polish

Data Framework Data modeling, data lineage, EDA

Add one concrete number and name your exact personal contribution before the real interview.

Claim 11

Needs polish

Governance & Ops Data documentation, KPI design, data quality checks, reconciliation

Add one concrete number and name your exact personal contribution before the real interview.

Claim 12

Needs polish

Tools Git, Microsoft Copilot, Databricks Workflows, Auto Loader

Add one concrete number and name your exact personal contribution before the real interview.
