AFTER OPTIMIZATION

KEYWORD MATCH BY CATEGORY

QUICK WINS

- ✓ Medallion architecture maps directly to 'enterprise data frameworks'
- ✓ 18 DAX measures + Power Query in HR project covers BI section exactly
- ! Add 'Azure Databricks' — biggest single keyword gap remaining
- ! Mention cross-functional stakeholders explicitly in project bullets

JD KEYWORD MAPPING & ALIGNMENT

Job Description Coverage Analysis

✓ FOUND IN OPTIMIZED RESUME

- SQL
- Power BI
- DAX
- Power Query
- Data modeling
- Data lineage
- Transformation rules
- Data quality
- Reconciliation
- KPI design
- Data documentation
- Databricks
- EDA
- BI reporting
- Metric logic
- Data framework
- Data governance
- Cross-functional

✗ MISSING / PARTIAL KEYWORDS

- Azure
- Azure Databricks
- Enterprise data governance
- Data integration
- Reporting pipelines

JD SECTION ALIGNMENT

JD REQUIREMENT	RESUME COVERAGE	STATUS
Data framework & models	Medallion architecture; HR data model bullets	STRONG
Metric logic & definitions	18 DAX measures + metric definitions in Pricing project	STRONG
Data quality & reconciliation	Reconciliation logic in Smart Energy; data cleaning	GOOD
Power BI, DAX, Power Query	4 projects with Power BI; 30+ DAX; Power Query	STRONG
SQL & Azure environments	SQL covered well; Azure missing — Databricks listed	PARTIAL
Data documentation & lineage	Data lineage documentation bullet in Smart Energy	GOOD
Cross-functional collab	Implied through multi-domain projects; not stated	PARTIAL

RECOMMENDATIONS TO PUSH SCORE TO 90+

01

Add 'Azure Databricks' Explicitly

Databricks is cloud-hosted on Azure. Add to your Skills section and at least one project bullet — closes the biggest gap.

02

Add a Cross-Functional Bullet Per Project

JD highlights partnering with Finance, Ops, and Tech. One line like 'Delivered to operations team' ticks this box.

03

Add 'Data Lineage' to Skills Section

Already in project bullets. Adding to Skills double-counts the keyword — ATS scanners check both sections independently.

04

Consider Databricks Unity Catalog

If used, maps directly to 'data governance' and 'enterprise data frameworks' — two primary JD focus areas.
