Shift duration: 3

A+

minutes

PERFORMANCE SUMMARY

You ran the floor about as well as it can be run. Critical risks got handled fast and patient safety stayed high the whole shift. Decision accuracy: 69%.

Decision accuracy: 69%. KPI health: 84%.

CASE LOG (13 EVENTS)

#	RISK / DESCRIPTION	PRIORITY	ACTION SELECTED	KPI IMPACT	OUTCOME	POINTS
1	Sepsis Risk Spike Ward 4B: a post-op patient's vitals match an early-sepsis pattern.	Critical	Deploy Rapid Response Rapid response team started antibiotics in time.	+6 Patient Safety +3 Patient Sat. +3 Care Efficiency +16 Operating Cost +120 Lives Protected	Optimal	+184
2	ER Overcrowding The emergency department is at 140% capacity with rising wait times.	High	Delay Decision Waits kept climbing. Some patients left.	-6 Care Efficiency -6 Patient Sat. -4 Patient Safety	Shortcut (delayed penalty)	+36

#	RISK / DESCRIPTION	PRIORITY	ACTION SELECTED	KPI IMPACT	OUTCOME	POINTS
3	Medication Error Risk A high-alert drug order shows a dosing conflict for one patient.	Critical	Escalate to Pharmacist Pharmacist corrected the dose before it was given.	+6 Patient Safety +3 Patient Sat. +3 Care Efficiency +8 Operating Cost +60 Lives Protected	Optimal	+196
4	Nursing Staff Shortage Night shift is short three nurses on the medical-surgical floor.	Medium	Approve Overtime Overtime covered it, but staff are stretched.	+3 Care Efficiency +26 Operating Cost -1 Patient Sat.	Suboptimal	+24
5	ICU Bed Shortage Two critical patients need ICU beds and only one is free.	Critical	Ignore No bed found. Patient held in the ER.	-8 Bed Capacity -6 Patient Safety -5 Patient Sat.	Shortcut (delayed penalty)	+36
6	Critical Equipment Failure A ventilator alarms with a hardware fault in the ICU.	Critical	Deploy Backup Unit Backup ventilator swapped in without a gap.	+6 Patient Safety +3 Care Efficiency +15 Operating Cost +80 Lives Protected	Optimal	+202
7	Infection Outbreak Three new hospital-acquired infections traced to one ward.	High	Activate Isolation Isolation protocol contained the spread.	+6 Patient Safety +2 Patient Sat. +2 Care Efficiency +16 Operating Cost +75 Lives Protected	Optimal	+148
8	High Fall-Risk Patient An elderly patient on sedatives keeps trying to get up unassisted.	Medium	No action taken Alert expired without response. Automatic penalty applied.	-5 Patient Safety -4 Patient Sat. -40 Lives Protected -2 Bed Capacity +8 Operating Cost	Expired (no action)	-48
9	High Readmission Risk A heart-failure patient is due for discharge with poor follow-up.	High	Schedule Follow-Up Follow-up and home meds arranged before discharge.	+5 Patient Sat. +3 Care Efficiency +3 Patient Safety +8 Operating Cost +40 Lives Protected	Optimal	+156
10	Critical Lab Result Delay A critical potassium result has sat unreviewed for 40 minutes.	Critical	Escalate to Specialist Result flagged and acted on immediately.	+5 Patient Safety +3 Care Efficiency +6 Operating Cost +50 Lives Protected	Optimal	+178
11	Sepsis Risk Spike Ward 2A: another post-op patient flagged by	High	Increase Monitoring Closer monitoring	+2 Patient Safety -1 Care Efficiency +6 Operating	Suboptimal	+36
