

#ABtalks · 60-DAY CLAUDE CHALLENGE

~~I used to think job searching was all about manually scrolling boards~~

Claude Connectors + **AI-Powered** Job Discovery

Today I connected Indeed directly to Claude using Claude Connectors.

No manual searching. No copy-pasting job links. Just prompts — and Claude did the rest.

*"Connectors turn Claude from a chat tool into an actual workflow layer. This is what **AI-augmented job search** looks like in practice."*

What Claude Connectors Unlocked

- 01 **Profile & Criteria Input**

Fed my professional background, target roles, preferred location (Delhi NCR), and CTC expectations to Claude.
- 02 **Live Indeed Search via Connectors**

Claude used Connectors to search Indeed in real-time, pulling fresh listings across Data Analyst, ML Engineer, and adjacent roles.
- 03 **Match Scoring & Breakdown**

Each role scored by fit %, estimated CTC, relevance to profile, plus a direct apply link — all in one structured output.
- 04 **Skill Gap & Market Demand Analysis**

Claude identified missing skills and mapped market demand trends to help prioritize what to learn next.
- 05 **Structured PDF Report Export**

Everything compiled into a clean, professional PDF — ready to share with mentors or use as a job search reference.

"The part that hit different — Claude flagged that **Prompt/GenAI Engineer roles are almost nonexistent for freshers in Delhi NCR** right now. Most GenAI work is embedded inside Data Analyst or ML Engineer roles at startups. That's the kind of market signal you won't find just scrolling job boards."

5	3	Delhi NCR	Rs.8 LPA
Roles found	Strong matches	Search area	Target CTC

TOP JOB OPPORTUNITIES

Company / Role	Location	Match	Est. CTC	Why it fits
Data Analyst Intern Edunova Technology Fresher-friendly · EdTech B2C	Delhi · May 2026	82%	Rs.3–5 LPA	Explicitly targets B.Tech/fresher profiles. Excel, SQL, Python, Power BI — all in your stack.
Analyst – Data & Analytics Saarthee Analytics Consulting · B2B Global	Gurugram · Mar 2026	75%	Rs.5–8 LPA	Wants Python, PySpark, SQL, Power BI, Tableau. Databricks + PySpark is a strong differentiator.
Data Analyst WinZO B2C Gaming · 250M users scale	Delhi · Jan 2025	68%	Rs.8–14 LPA	Strong skill fit (SQL, Python, BI, ETL). dbt/Airflow gap — frame Databricks pipelines as parallel.
Data Engineer ShyftLabs B2B Fortune 500 · 3–5 yrs req	Noida · Feb 2026	42%	Not disclosed	GCP/BigQuery stack, needs 3–5 years experience. Revisit in 1–2 years.

SKILLS ANALYSIS

Skills you already have	Skill gaps to close
Python · Pandas · NumPy SQL / MySQL Power BI + DAX Tableau PySpark Databricks Delta Lake Advanced Excel Generative AI / LLM Anthropic Claude API Git EDA + Data Viz	dbt (data build tool) Apache Airflow / Composer A/B testing + statistics BigQuery / GCP Mixpanel / Amplitude LookML / Looker Product analytics Statistical modeling Cohort / funnel analysis

OVERALL FIT ASSESSMENT

Data Analyst roles		78%
Data Science roles		52%
Prompt / GenAI Engineer		60%
Data Engineering roles		38%

CTC reality check: Fresher DA roles in Delhi NCR offer Rs.4–7 LPA typically. Your Rs.8 LPA target is achievable at product/consulting companies (WinZO, Saarthee) by leading with your GenAI + Databricks differentiator.

MARKET DEMAND INSIGHTS

01

GenAI + Data combo is rare at fresher level
Very few freshers hold Anthropic API certification + Databricks + PySpark. This is your #1 differentiator — lead with it on every application.

02

Power BI is the dominant BI tool in Delhi NCR
Your DAX + Power Query depth puts you ahead of most freshers who only know Excel.

03

Dedicated Prompt/GenAI Engineer roles are scarce for freshers
Most GenAI work is embedded inside Data/ML Engineer roles at startups. Target DA roles that mention 'AI' or 'automation' in the JD.

04

B2C product companies are highest-fit for your profile
Gaming, edtech, and ecommerce firms need dashboards, user funnel analysis, and retention metrics — exactly what your capstone projects demonstrate.

RECOMMENDATIONS TO IMPROVE INTERVIEW CHANCES

1

Add a GitHub with project notebooks
Recruiters at WinZO/Saarthee-level will check. Your Databricks + NutriScope projects need public repos with clean READMEs.

2

Learn dbt basics in 1–2 weeks
Appears in nearly every mid-senior JD. Free dbt Learn course. Adds Rs.1–2 LPA negotiation leverage immediately.

3

Reframe your resume headline
Lead with 'Data & GenAI Analyst | Python · SQL · Power BI · Databricks · Anthropic API' — the GenAI angle makes you stand out instantly in a fresher pool.

4

Build one cohort/funnel analysis case study
Gaming and edtech companies live by retention and funnel metrics. A public notebook showing MAU/DAU, cohort retention, or funnel drop-off is a direct signal.

5

Apply to Saarthee and Edunova first
Saarthee = best salary-to-fit match (Rs.6–8 LPA, global exposure, PySpark stack). Edunova = safest first full-time entry to build your professional record.
