JOB OPPORTUNITY RED FLAG ANALYSIS

Position: Data Analyst (Fresher)
Company: Clovity (San Francisco-headquartered, Atlassian Partner)
Company Size: 51-200 employees
Your Profile: Lakshay Sharma | Final Year B.Tech CSE (Data Science)
Analysis Date: June 14, 2026

OVERALL RISK SCORE32/100

RECOMMENDATION: APPLY

This is a well-designed entry-level role with good growth potential. The company has solid credentials and the role aligns well with your skillset.

TOP RED FLAGS

Severity	Flag	Details
4/10	No Remote/Location Clarity	Job posting doesn't specify remote work policy or India office location. Confirm if remote or office-based.
3/10	No Salary Information	Expected for India market, but means you'll negotiate blind. Research Atlassian India salaries.
3/10	Small Company Size	51-200 employees = early-stage. Less stability than 500+ firms, but more learning.
2/10	San Francisco HQ, India Hire	No red flag here—distributed teams are normal. But clarify reporting structure and travel.

POSITIVE SIGNALS

Perfect Fresher Role	Explicitly welcomes 2024/2025/2026 passouts. No experience trap here.
Tech Skills Match	Your Power BI, SQL, Excel, Python background directly aligns. Strong fit.
No Toxic Language	Job description is clean. No "rockstar," "hustle culture," or overwork signals.
Established Company	Clovity: Inc. 5000 (6 years), Great Place to Work Certified, minority-owned.
Growth Opportunity	Atlassian ecosystem knowledge = valuable for career. High-demand skill.
Clear Responsibilities	Well-defined role scope. Not vague. You know what you're building.

RISK BREAKDOWN BY CATEGORY

Category	Risk Level	Assessment
Requirements	Low (1/10)	Fresher-appropriate. No impossible asks. You're qualified.
Culture & Toxicity	Low (1/10)	No red flags. Great Place of Work certified. Professional JD.
Remote/Location	Medium (4/10)	Unclear. Must clarify if remote/office-based in Delhi NCR.
Hiring Practices	Low (2/10)	Standard. Only gap: no salary transparency (expected in India).
Company Stability	Medium (3/10)	Small-to-mid size. Established 6+ years with steady growth. Monitor funding.

5 SMART INTERVIEW QUESTIONS

Use these to validate risks and understand the role better:

1. Remote Work & Location

"Is this role remote, hybrid, or office-based? If office-based, is it in Delhi/NCR? What's the team structure—are there other India-based analysts?"

2. Career Progression

"This is a fresher role—what does the growth path look like after 1-2 years? Are there opportunities to move into advanced analytics or data engineering?"

3. Mentorship & Learning

"Will I have a dedicated mentor or manager for learning? What's the training budget for certifications (e.g., Databricks, advanced Power BI)?"

4. Team & Company Stability

"How many analysts are on the team? What's your recent hiring trend—growing or stable? Any recent funding or expansion plans?"

5. Day-to-Day Work

"Can you walk me through a typical week? What percentage of time is spent on ad-hoc requests vs. building dashboards? Who am I reporting to?"

WHY APPLY:

This role is a genuine entry-level opportunity with a reputable company. Your technical skills (Power BI, SQL, Python, Excel) are directly applicable. The role offers structured learning in BI/dashboard work—a key skill for your career goal of becoming a Data Analyst/BI specialist. Clovity's Atlassian partnership means exposure to enterprise-grade tools and methodologies.

NEGOTIATION POINTS:

- Confirm work location flexibility (remote/hybrid preferred given company HQ is in SF)
- Ask for learning budget (■1-2L annually for certifications)
- Clarify salary range based on your qualifications (suggest ■3.5-4.5L range for freshers with your certifications)
- Request mentorship structure upfront
